EMBROIDER

Cut 2 pieces of fabric to fit the large hoop. Hoop in three layers. On the bottom: fabric with right side down then stabilizer and fabric right side up on top. This will result in a flower that is pretty both front and back. Slide on the embroidery unit and select design 14. Thread your sewing machine with embroidery thread on top and matching sewing thread in the bobbin.

Embroider one flower. When finished, remove the hoop and cut out the flower. Cut about 1/8" (3 mm) outside the embroidery.

Decrease the flower about 20% in your sewing machine and embroider one in that size. Hoop as above. When finish repeat as before.

Place the small flower on top of the larger one. Make small loops of the satin ribbon and arrange them as a small flower in the center of the embroidered flower. Select A38 on your Designer SE. It will automatically drop the feed teeth on your sewing machine. Sew the ribbon in place through all the layers.
