

Designer SE update version 9875

? Quick Help

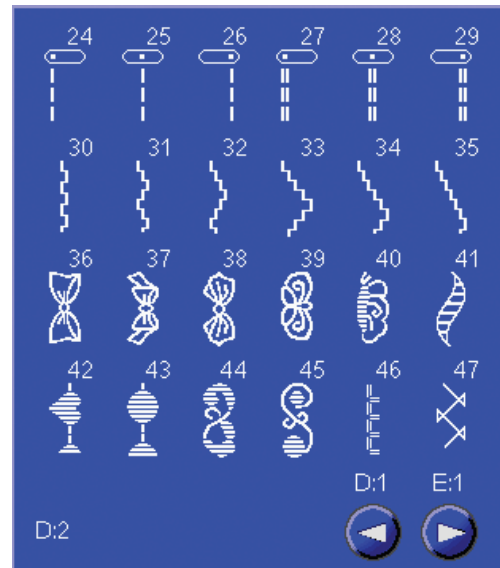

Your Designer SE has a built in Quick Help, which gives you instant information about everything you see on the Interactive Designer Screen. Touch **?** in the top right corner of the screen. It starts flashing indicating that Quick Help is active. Touch the icon or part of the screen you want information about. A pop-up window gives a short explanation for that specific icon. Touch  to exit Quick Help.

When a USB mouse is connected, it is even easier to use the built in Quick Help. Place the cursor over the icon and right click on the mouse and Quick Help will pop-up instantly.

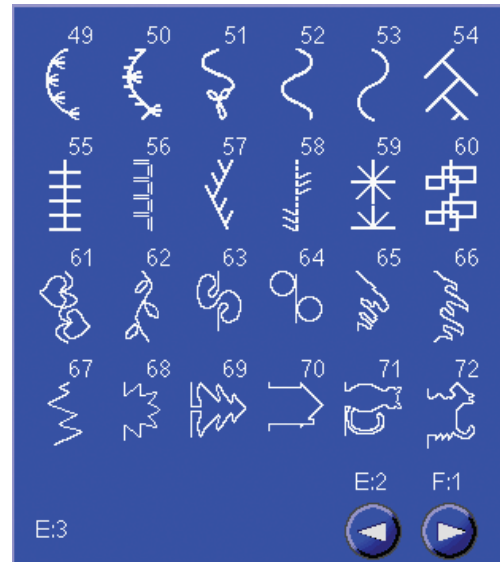

New Stitches!

- Stitch D47 (Herring bone stitch) as requested by quilter's for joining batting pieces with edges butted together
- Stitches E61-72 (12 special quilting and embellishment stitches many suggested by Designer SE owners)
